

The logo is centered on a dark blue background with a subtle starry pattern. A large, glowing teal ring with a textured, nebula-like appearance surrounds the text. The text 'ARC' is in a large, white, serif font, with a thin white wavy line passing through the middle of the letters. A small 'TM' trademark symbol is to the upper right of 'ARC'. Below 'ARC', the word 'INTERO' is written in a smaller, white, spaced-out sans-serif font.

FRONT SURFACE PROTECTION / BACK SURFACE REFLECTIVE AWARENESS

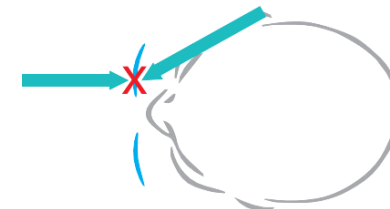

All high index lenses we provide have 100% UV filter embedded in the material, which prevents UVA and UVB rays passing through the front of the lens.

Tests on our standard crystal AR coating show that high levels of UV light can reflect from the back surface of the lens. This accounts for as much as 45% of exposure.

Our new Diamond Intero coating solves the high reflectance issue by absorbing UV rays hitting the back of the lens. Thus, providing our best all round UV protection.

UV REFLECTANCE
