

Exclusion Criteria

Patients deemed permanently unfit for surgery at pre- assessment are unable to proceed to surgery at SpaMedica:

- Patients with severe head tremor at rest. Mild head movements can be listed
- Patients with extreme claustrophobia who are unable to lie with a drape over their face for surgery
- Patients with severe dementia
- Patients with severe learning difficulties
- Epileptics who have more than one grand mal seizure per month
- Patients that require sub- speciality co- management, e.g. recurrent uveitis, brittle or end stage glaucoma
- Patients requiring a hoist to transfer
- Patients deemed best seen under general anaesthetic, for the patients best welfare

Please note, if you are in doubt, any patient deemed permanently unfit for surgery at SpaMedica pre assessment will be referred to an appropriate provider by SpaMedica, if the patient wishes to come to SpaMedica for their initial assessment.

If you have any questions about our exclusion criteria please contact us.
