-----------------------------	--

For administrative use only	
-----------------------------	--

**Note 1** – 'Continuous personal supervision' is defined as the presence of the supervisor on the premises, whilst the person training as a contact lens optician is attending any patient so that the supervisor is able to ensure that no untoward consequences to the detriment of the patient can arise from the actions of such a person.

In the event of the temporary absence of the supervisor due to ill health or holidays, it is the supervisor's personal responsibility to ensure another suitably registered contact lens optician or optometrist is accessible to provide the required degree of supervision, and that that person is willing to provide the temporary supervision. For an extended period of cover (in excess of four weeks) approval of such arrangements must be agreed with the Association. (See Supervision of Trainee Contact Lens Opticians below)

**Note 2** – The Primary supervisor is required to complete a declaration which is submitted with the case records prior to the examination sitting, confirming that –

- The trainee has completed a minimum of 224 hours personal clinical experience.
- The case records submitted for the practical examination are anonymised records of contact lens fittings and aftercare consultations by the candidate for patients at the practice.

## **SUPERVISION OF TRAINEE CONTACT LENS OPTICIANS**

The Trainee Contact Lens Optician must spend a minimum of 1 day per week in contact lens practice (or equivalent) until they have joined the Contact Lens Specially register. A minimum of 224 hours of personal clinical experience is required prior to entry to the practical examination. This must take place under a Primary or Supporting supervisor and at a practice approved by the Association of British Dispensing Opticians. Provisional approval will be given on the signing of the above undertaking that the requirements set out can be and will be met.

- Subsequent confirmation of approval by the ABDO
  - Full approval is given for a three-year period.
  - Approval will not be given if a Primary supervisor or practice falls short of the Association's requirements. Conditional approval may be given if the issues can be readily resolved.
  - In the event of Conditional Approval, the candidate may only attempt the examination once. The conditions are required to be resolved before there may be any further attempts of the practical examination.
- Refusal or withdrawal of approval may occur should it appears to the Association that the criteria for approval are not being met in the case of any supervisor or practice, it may withdraw approval, either provisional or full, at any time.

In the event of any questions arising as to the interpretation or observance of the requirements, the decision of the Association shall be final.

\* Please complete the information below with the NAMES OF THE MANUFACTURERS and TYPES of the lenses used in the practice, and answer YES/NO regarding equipment etc.

**LIST of LENSES and EQUIPMENT available for Contact Lens Training at \*** .....

Range of Contact Lenses used in practice (should include a range of materials and designs – replacement modalities where applicable – so that the trainee receives a broad experience of products)	Soft	
Range of Contact Lenses used in practice (should include a range of materials and designs, so that the trainee receives a broad experience of products)	Rigid	

Are any lenses re-used (for complex fittings e.g. Keratoconus)?	YES / NO
